

AUTORZY ILUSTRACJI

Ilustracje do tego wydania *Stedman. Wielki słownik medyczny angielsko-polski* zostały stworzone lub przystosowane przez następujących autorów i firmy (źródła przystosowanych rysunków podano w BIBLIOGRAFICZNE ŹRÓDŁA ILUSTRACJI):

Anatomical Chart Company: amniocentesis, coronary artery, atherosclerosis, separation of blood components, septal defects, diaphragm, fissures, kidney, liver lobule and sinusoids, cranial nerves, thrombosis. Wszelkie prawa zastrzeżone.

Mary Anna Barratt-Dimes, Parkton, MD: dark and light adaptation, pure tone audiogram, circadian rhythm, coenzyme, dose response curve, cardiac cycle, Venn diagram, electropherogram, electroretinogram, heteroduplex formation, myocardial infarction, mendelian inheritance, kinins, menstruation, nomogram, operon, polycythemia vera, radioimmunoassay, radioallergosorbent test, retrovirus, Ogino-Knaus rule, sick sinus syndrome, mononuclear phagocytic system, reverse transcriptase, inheritance of translocation trisomy, active transport, vasopressin, lung volume compartments, fever, tympanogram, HIV infection, cell-mediated immunity, humoral immunity, immunoglobulin, olfaction, horopter plane, formation of image on retina, antigen presenting cells.

Kathryn Born, Arlington, TX: palpation of prostate gland.

Susan Caldwell, Parsonsburg, MD: antigen presenting cells, frequent numeric chromosome aberrations, aberration (spheric), aerosol therapy, food allergies, antibiotic groups, autoimmune disease in humans, classification of bacteria, ABO blood group, muscles used in breathing, Angle classification of malocclusion, coagulopathy, minimal alveolar concentration, diagnosis of cytomegalovirus, types of emphysema, accommodation of eye, development of fetus, nerve fiber groups, types of glycogenesis, nomenclature of hepatitis antigens, classification of human herpesvirus, FDA approved clinical uses of interferons, lymphocytes, maldigestion or malabsorption, tumor markers used in primary diagnosis, main components of nonprotein nitrogen, pressure: various units, clinical diagnosis of HIV-infected patients, cardiomyopathies (WHO classification), Ann Arbor system, viruses associated with acute gastroenteritis in humans, major digestive enzymes, antibody-dependent cell-mediated cytotoxicity, T-helper subsets, insulin, some common lasers used in medicine, Head lines, plasma lipoproteins, lochia, milk, etiology of osteomalacia, acute pancreatitis, precancers, intracardial pressure, plasma proteins, rating of perceived exertion, α -adrenergic receptors, afferent and efferent reflexes, Glasgow coma scale, Apgar score, sensation, sphingolipidoses, TNM staging, autonomic nervous system, taxonomy, coatings of the tongue, classification of conjoined twins, viral embryopathy, vitamins and minerals, causes of vomiting, hydronephrosis, urine, oncogenic viruses, differential diagnosis of hypercalcemia, differential diagnosis of hypocalcemia, representative DNA-containing tumor viruses, cytokines and chemokines, summary of nonspecific host defenses, classification of hypersensitivity reactions, complement components, adhesion molecules involved in leukocyte migration, major groups of viruses, rabies postexposure prophylaxis guide, lymphoma classification, classification of primary immunodeficiency disorders, International Lymphoma Study Group, assessment of chest pain, important deep tendon reflexes, neurotransmitters, collagen, inflammation, delusions, depression, sleep, wound types, diabetes mellitus, and motor, social, verbal development of child.

Jonathan Dimes, Parkton, MD: respiratory volume.

Duckwall Productions, Baltimore, MD: osteoarthritis, homunculus.

Neil O. Hardy, Westport, CT: olfaction, abdominal regions, alveolar abscess, accommodation, ameba, amnion, surgical anastomosis, angina pectoris, artery, bacteriophage, blood brain barrier, biceps & triceps muscles, bite, bone, segmental bronchi, coronary bypass, caduceus, callus, capillary bed, Foley catheter, chromosome, fetal circulation, pulmonary circulation, anastomosis clamp, cochlea, colostomy, successive contrast, sensory corpuscle, spinal curvatures, dentition, dermatomes, digestive organs, diverticulosis, diverticulum, postural drainage, cochlear duct and spiral organ, nasolacrimal duct, dura mater, ear, ECG lead placement, embolism, human embryos, endocrine system, enterostomy, esophagus, eye, fetus, fibroids, bone flap, flexures, ovarian follicle, obstetric forceps, foxglove, types of fractures, Le Fort fractures, spinal ganglion, gastroenterostomy, gastrula, glands, glaucoma, glomerulus, graft types, gustation, hair, hemodialysis, hemothorax, indirect inguinal hernia, types of hydroceles, hydrocephalus, hyperopia, hyphema, ileocolostomy, ileostomy, cochlear implant, dental implant, surgical incisions, injection, innervation of the hand and wrist, insects and arachnids, islets of Langerhans, temporomandibular joint, keratoconus, full and partial corneal transplantation, kidney anomalies, germ layers, cruciate ligaments of knee, heart-lung machine, Heimlich maneuver, closed chest massage, muscles of mastication, Mastigophora, electronic fetal monitor, mouth, musculature, myopia, structure of the nail, nasopharynx, nematode, nephrolithiasis, nephron, Heberden nodes, nutrient absorption, total parenteral nutrition, nystagmus, surgical procedures to control obesity, orbit, female

reproductive organs, male reproductive organs, auditory ossicles, osteoporosis, otitis externa, otitis media, ovulation, palpation of liver, pancreas, circumvallate papillae of tongue, bimanual percussion, periosteum, phalanges, central placenta previa, planes, Plasmodium, lumbosacral plexus and sciatic plexus, Toxicodendron, sites of ectopic pregnancy, prostate, peripheral pulses, lumbar puncture, renal pyramid, quadrants, respiration, mouth-to-mouth respiration, layers of the retina, abdominal retractor, position of the uterus, Babinski sign, paranasal sinuses, cell receptor site, skin components and layers, poisonous snakes, somites, human spermatozoon, spleen section, splenomegaly, airplane splint, sprain, sternum, stomach, swallowing, synapses, hepatic portal system, meniscal tears, talipes cavus and talipes planus, tendons and ligaments, Barany caloric test, hammer toe, tooth, torsion, tracheostomy, rubrospinal tract, urinary tract, transplants and prostheses, twins, decubitus ulcer, open urachus, heart valves, venous valves, varicosis, vasectomy, major veins of the body, venom, ventricles of the brain, internal podalic version, HIV, vision, vulva, wound healing, intervertebral disc herniation, phagocytosis, spinal column, lungs and respiratory anatomy, reflex arcs, baroreceptors, haversian canal, erythrocytes, fontanelles and sutures, gallbladder, intestines, laryngeal cartilages, skeletal muscle, typical efferent neurons, organelles, somatic and visceral pathways, development, scoliosis, flexor tendon sheaths, cranial venous sinuses, spermatogenesis, corticospinal tract, knee joint, spinal cord and meninges, breast, cell with organelles, thoracic and right lymphatic ducts, vocal folds, Bryant traction, spinal cord injury, episiotomy, pyloric stenosis, fetal presentations, neuroglia, Pap smear, cardiac tamponade, superficial veins, CT illustration, sonography, MR imaging, fiberoptic bronchoscopy, laparoscopy, assessment of chest pain, important deep tendon reflexes.

Timothy Hengst, Thousand Oaks, CA: amputation.

Siri Mills, Munich, Germany: human heart, penis, base of bladder and urethra, spinal cord, female genital tract.

Michael Schenk, Jackson, MS: perirectal abscess, venous angle, bomb calorimeter, human calorimeter, carcinoma, boutonniere deformity, developmental milestones, jersey finger, mallet finger, sliding esophageal and paraesophageal hernias, intracranial infections, skinfold measurement, spinal nerves, pinch and grasp patterns, spina bifida occulta, carpal tunnel syndrome, carpal tunnel.

Mikki Senkarik, San Antonio, TX: radiographic projection, Kawasaki disease, regional anesthesia for childbirth, Leopold maneuvers, caput succedaneum, arthroplasty, internal fixation, hypothalamic-pituitary-thyroid axis, positions, stripping of the saphenous vein, heart transplantation, external cephalic version, different configurations of skin lesions, lateral position, oblique position, dorsal decubitus position, lateral decubitus position, ventral decubitus position, right anterior oblique position, left anterior oblique position, left posterior oblique position, right posterior oblique position, thoracoscopy, esophagogastroduodenoscopy, colonoscopy.
